

XLR2UTP5-2 Installation

XLR2UTP5-2 connects up to two external wireless microphone receivers with XLR outputs such as Sennheiser, AKG, Audiotecnica, Shure, ... into Yealink MS Teams and Zoom Room devices.

Interconnection

- XLR F input 1 - output 1 from your wireless mic receiver
- XLR F input 2 - output 2 from your wireless mic receiver
- RJ45 PoE - to your existing Yealink PoE switch

Use only with VCM35 microphones (or with no Yealink mics).

See our similar products for installations with other Yealink microphones.

The number of XLR2UTP5-2 units per Yealink video room device follows the same rules as for VCM35 mics.

Speech from wireless microphones is transmitted to the remote side, it is not played back locally.

You can separate Mute control in the **Yealink Room Connect** application:

- Separate Mute control <https://support.yealink.com/en/portal/knowledge/show?id=6459d54c0a11b818a7542883>
- Rename Mic <https://support.yealink.com/en/portal/knowledge/show?id=6459d54c0a11b818a7542888>
